### **DETAILED ACTION**

Claims 1-22 are pending.

#### ***Election/Restriction***

1. The Applicant's election of Group I, claims 1-13 and 22, is acknowledged. Because the Applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 1-13 and 22 are considered and claims 14-21 are withdrawn from consideration.

#### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 1 recites that "the radiation from the heat source passes to areas of the mask that are not being exposed to radiation." It is unclear as to how radiation can pass to areas that are not exposed to radiation. It appears from the claim language that there is only one source of radiation, that is, the heat source. It is unclear as to whether exposure radiation is being claimed. Also, the claim recited that heat is filtered to the mask areas subject thermal heating. This is unclear as it appears that because heat is filtered to the areas, the areas are subject to thermal heating. Claims 2-13 are rejected as being dependent on claim 1.

Art Unit: 1756

5. Claim 1 recites the limitation "the radiation" in lines 4 and 7. There is insufficient antecedent basis for this limitation in the claim. Claims 2-13 are rejected as being dependent on claim 1.

6. Claim 2 recites the limitation "the radiation" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim. Claims 5-7 are rejected as being dependent on claim 2.

7. Claim 4 recites the limitation "the radiation" in line 2. There is insufficient antecedent basis for this limitation in the claim. Claim 9 is rejected as being dependent on claim 4.

***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1, 11, 12 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by US# 6,228,540 to Kobayashi.

Kobayashi teaches supplying heat from a first heat source located under a photomask board whose surface is coated with a resist and partially supplying heat to the board from a second heat source located outside an end surface of the board and a cooling process for cooling the photomask board while partially supplying heat to the board from a second heat source located outside the end surface of the board (col. 4, lines 35-55). Kobayashi also teaches heat treatment equipment such as a base plate that is arranged under the photomask board and

Art Unit: 1756

supplies heat to the board and also teaches an end surface use plate that is arranged on an end surface side of the board and partially supplies heat laterally to the photomask board (col. 5, lines 60-70). The base plate supplies heat to the mask that are not being exposed to radiation and the end surface use plate filters heat from areas of the mask that are subject to thermal heating. The filter in Kobayashi comprises the base plate and the end surface use plate. Kobayashi teaches that the heat source and mask move together (col. 2, lines 40-45).

#### ***Allowable Subject Matter***

10. Claims 2-10 and 13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
